

# iOS Programming Assessment v1

---

## Goal:

Create a simple app to look up the meanings of acronyms/initialisms.

---

## Functional Acceptance Criteria

1. User can enter an acronym or initialism
  2. User is then presented with a list of corresponding meanings
- 

## Technical Details

1. Use the API available here to get the meanings for an acronym/initialism:
  - <http://www.nactem.ac.uk/software/acromine/rest.html>
2. Project must conform to these parameters:
  - Project must be in Xcode 6
  - Project must be written in Objective-C
  - Project must use AFNetworking 2.0 for networking
    - <https://github.com/AFNetworking/AFNetworking>
  - Project must use MBProgressHUD for wait indication
    - <https://github.com/jdg/MBProgressHUD>
3. When complete, the project must be posted to Github for review.
